

Research Highlights

61% of Americans have **no money** saved for their healthcare expenses

64% have **avoided or delayed** medical care in the last year due to expected costs

44%

of patients would not receive needed medical care, even if it put their health at risk, knowing they would have **out of pocket expenses of more than \$500.**

Of the patients who reported delaying or avoiding medical care at least once in the last year due to costs:

23% avoided or delayed follow up care after an inpatient hospital stay

18% avoided or delayed a wellness visit to a physician

12% avoided or delayed prescribed rehabilitation or therapy after a surgery or procedure

69%

of Americans reported that their deductible was at least **"somewhat difficult" to afford.**

22%

reported "very difficult" or "impossible."
